Postmaster send address change to: Circulation, Servi-Tech, Box 1397, Dodge City, KS 67801-1397. Periodicals postage paid at Dodge City, KS.

## Fall Herbicides

 by Jeff Kugler  
Regional Manager, York, NE

This past spring growing conditions for summer crops were less than ideal for a few weeks. This created some difficult conditions to get early burn-down herbicide applications to control those nasty winter annuals that had been growing since early last fall. The odds are pretty good the same conditions will be back with us next spring and the same problems will exist. If you continually do the same things you tend to get the same results.

Fall herbicide applications have turned this problem around in many weedy winter annual fields. Time is the biggest consideration, and the more that gets done in the fall, the more relaxed the spring becomes with less stress on producers and their field management. (cont'd on page 2)
